Subject: WI and OH template revisions
Attachments: RTC Template of SO2D Comments 04242013.mp.docx

FYI, Here's the SO2 120 day letter comment response template with some draft revisions to WI and OH/WV comments. See 3.2.5.5, 3.2.5.6, and 3.2.11.3. My additions should show up as tracked changes. Note, we haven't fleshed out the complete responses to these comments yet, or cleared them with management, or fully discussed the Ohio/WV comments with Region 3; so the responses here should be viewed as placeholders for now.

General question: why is the bolded docket identification info shown AFTER the comment responses? This is confusing, since the next comment (from someone else) follows without warning. The docket info should be at the beginning of the comment(s), or else the transition to the next comment must be made more prominent.

I have not made this change in the draft template, but I will mention it to Rhonda Wright and Steve Scofield.
